**4. B. Information Regarding Columbariums**

**[Discussion]**

This item is reserved for discussion of the potential future construction of a columbarium. Columbariums are structures that include niches for the repose of cremated remains. They can help to provide for the efficient use of land, considering the increasing demand for cremation burials. The Committee has discussed this topic for the last several years and requested information regarding design, cost and potential locations at the June meeting with the discussion of the operating budget. The attached information has been provided by Chair Shea Dow and will assist the discussion at the meeting. *Please refer to the attached materials regarding columbariums.*
