Re: Manager Report and Recommendations – April 10, 2024 Planning Commission Meeting

6. A. Recreation Plan Implementation

[Discussion]

This agenda item is reserved for discussion of priorities for parks and other improvements that the Planning Commission would recommend to Council to implement the Recreation Plan. The City is in the process of developing the Fiscal Year 2024-25 budget that will be effective on July 1. Recommendations for budget items will need to be prepared by the May Planning Commission meeting. In order to assist with the discussion, the Action Plan from the adopted Recreation Plan is attached, which shows the order of priorities that were previously identified by the Planning Commission. Also attached is a proposal for engineering services to develop an engineering concept and grant application for Wright Street. Staff will be prepared to discuss potential projects and to record brainstorming and Planning Commission questions so that a recommendation can be acted on in May. To view the complete Recreation Plan, view it online here: https://bit.ly/JV_RecPlan2024. *Please refer to the Recreation Action Plan and Wright Street Park Proposal.*

7. A. Project Updates

This section of the agenda is reserved for an update on current and pending projects in the City.

RE: Proposal for Professional Services for City of Jonesville Wright Park Conceptual Master Planning

Dear Mr. Gray:

Thank you for sharing your vision for your community's recreational needs at the City of Jonesville Wright Park with Matt Biolette. The overview that you shared with him was very beneficial in our understanding of the City goals for the park. The City property is located at the crossroads of Village Lane and Wright Street, and is composed of roughly 5.5 acres, which is currently utilized for mostly baseball activities.

Preliminary park elements identified as part of a community survey are:

- Walking trail
- Event pavilion with seating area
- Basketball court
- Pickleball courts
- Improved / paved parking lot
- Baseball diamond improvement
- Small and large dog run areas

The goal is to develop a conceptual master plan that would serve as a basis for pursuing grant funding and aid in forming collaborative partnerships with other area organizations. The master plan would then serve as the basis for a grant application with the Michigan Department of Natural Resources (MDNR) and other funding entities.

SCOPE OF SERVICES

We propose to provide the following services for park master planning of the City of Jonesville Wright Park as follows:

TASK A - PARK MASTER PLAN GUIDEBOOK

1. ORIENTATION AND ANALYSIS

The project will begin with a project kickoff meeting that includes representatives from the City staff, City board and committee members, and F&V staff assigned to the project. This meeting will provide direction to F&V and establish clear roles of team members and expectations for the lines of communication. Aerial

mapping with topographical and parcel boundaries will be provided electronically by the Hillsdale County GIS will serve as the base plan for master planning.

We will review and photograph all the existing features within the park. This inventory and analysis will aid us in indentifying:

- Potential recreational uses that may impact a master plan and the perception/need for existing or new park elements. This includes those facilities mentioned earlier in this letter and other amenities to meet the needs of the local community.
- Utility infrastructure improvement needs that may affect master plan phasing. This will include evaluation of the existing storm drainage, sanitary sewer, water service, and electrical systems. Improvements must consider initial capital investment by City for the various recreational activities and use zones.

Once all inventory and analysis of site conditions and features has been developed, including a photographic inventory of the City property, we will review the issues and opportunities listed above with associated costs to inform and communicate with the City staff. We will share this information at a public work session.

2. MASTER PLAN REFINEMENT

We will use our extensive experience in our issues-based design approach to develop a conceptual master plan for review and preliminary approval by City staff and related agencies. These approaches will include identifying potential recreational uses and park elements that impact a design. Programming needs for recreational uses such as parking, play areas, restrooms, pavilions, pathways, day-use areas, and other associated recreational needs to be defined early in the process.

With priorities and preferences defined, conceptual design alternatives will be refined into a final master plan. The master plan development will be supported by illustrations, details, sketches, and graphic images to further define the nature of recreational infrastructure and landscape features. A 24" x 36" rendered plan sheet for public viewing will be provided.

Final development of the conceptual design will be refined based on City review to focus on improving overall park functionality and with an emphasis on user safety as well as options promoting universal access, particularly to enable people of all ages, needs, and ability to reach and enjoy the parks' resources.

Budget considerations will be integral to the process from beginning to completion of the schematic design and beyond. We will prepare detailed engineer's estimate of probable construction costs for the chosen option including phasing recommendations and will include future estimated professional services cost for preliminary design, final design, and construction oversight.

We will develop a summary of the recommendations and a final graphic color-rendered master plan with design details for elements and treatments for the park. Also included in the master plan will be information with regards to various grant programs specifically in the area of recreation enhancement that the City may want to consider aiding in funding improvements.

TASK B - MICHIGAN NATURAL RESOURCES TRUSTS FUND (MNRTF) GRANT APPLICATION

We can guide the City and assist with the preparation of a MNRTF Grant Application. The application must be submitted by the application deadline of April 1 with the following:

1. Site master plan graphic showing the proposed Wright Park improvements as determined by the City.
 - a. All elements proposed under the grant application must be identified and labeled.
 - b. Project location map.
 - c. Boundary map – Legal description provided by community must delineate the legal boundaries of the property identified for park use.
2. Elevations and plan views of any proposed structures.
3. MNRTF Grant Application Form – one copy fully completed by F&V and signed by authorized community representative.
4. Application narrative prepared by F&V with information provided by City staff.

5. Documentation of local financial match such as letters of commitment from the source.
6. Certified resolution from the governing body committing to the application.
 - a. Resolution to be adopted at a public hearing with an advertisement 7 days prior to meeting. F&V will provide a sample ad and resolution.
 - b. City to provide a copy of affidavit from local paper.
7. Documentation of Site Control Form (PR1956-1). Completed by community and community's legal counsel.
8. City will be tasked with gathering any letters of support from local stakeholders and groups.
9. Prepare supplemental information, if necessary, after preliminary application scoring in August of the year of application.

SCHEDULE

A summary of the anticipated tasks and timeline is as follow. For the sake of preparing a schedule, it is assumed that a contract for the proposed project will be awarded on or about April 18, 2024. It was discussed that it is intended to have master plan drawings available by July 1, 2024.
